

ACTIVE DISPLAY GROUP:

PIXALUX

Pixalux light panels are an innovative way to light up any architectural space, commercial space or can be used in retail design applications.

These light panels are LED edge lit. A patented technology enables the input of light, along the edge of the panel, to evenly illuminate the entire surface of the panel. It produces a soft diffused light which is considered more desirable than a point source light and is not harsh on the eyes.

Why Pixalux?

- Even Light
- Frameless
- Robust
- Thin Profile (16mm)
- Low Power consumption
- Cool running (no heat output)
- Versatile
- Double sided or single sided illumination
- Different edge finishes
- Panels can be fitted with different types of aluminum extrusion for mounting purposes
- Comes in a range of colours
- Max size: 2400mm x 800mm
- Shadow Free
